

# Team Charter

Haiyang Chen, Shiaw-Shiuan Chuang, Grace Jensen, and Zhiqiang Ji

## Overview

Our data science research team is dedicated to collaborating on the final research project and exploring the problem of K-12 educational disparity in the District of Columbia. Our team charter outlines the values, goals, and expectations to ensure that we are working together efficiently and effectively.

## Values

- **Collaboration:** We value the input and expertise of all members of the team, and strive to foster a collaborative and inclusive environment.
- **Integrity:** We are committed to conducting our research with integrity, transparency, and ethical standards.
- **Originality:** We are committed to providing original insights and jointly advancing the exploration of the issues under study.

## Goals

- Conduct high-quality research based on what we've learned from and bring to DS I class.

- Build a friendly, inclusive, diverse, and mutually supportive team.
- Advancing understanding of the issue of educational disparity and inviting new ideas to our discussion.

## Expectations

- All members are expected to participate actively in group meetings and discussions.
- Each member is responsible for contributing to the research and analysis of their assigned tasks.
- Members should communicate regularly and openly with the group to ensure that everyone is on track and working towards our shared goals.
- Members should provide constructive feedback and support to each other to foster a positive and productive team dynamic.
